

Course Statistics

The Course Statistics feature allows instructors to view graphical representation of the frequency at which the students access the site. The Course Statistics allows instructors to view overall usage, usage in specific content areas, usage by specific groups, and usage within discussion forums.

From the Control Panel:

1. Click on the **Course Settings** link in the Assessment section.
2. Choose a report from the **Select Report** pull down list.
3. Select **Start Date** and the **End Date** from within the Filter Options.
4. Scroll down to the bottom of the page and click the **Submit** button.

More Information

Q: How can I view the statistics of individual Content Areas?

A: In Statistics you will be given the options to view Groups, Forum, Overall Summary, and Content Areas from the **Select Report** pull down list.

Q: Can I view the statistics of individual people in my class?

A: Yes, you are able to view the statistics of All Users or Selected Users who are in your class. You can specify this on the User options within Filter Options of the Course Statistics.

Q: How do I print my course statistics?

A: Once you specify the Select Report, there will be a **Print** button in the top of the page.

Q: Why would I want to export data?

A: Exporting data lets you save the statistics of your class on your hard drive. This will allow you to work with the course statistics on your computer but will not alter the statistics you have online. This file will be a .csv file that can be altered through Excel.

Q: What does the Change Filter button do?

A: The **Change Filter** button allows you to go back to your Course Statistics page and alter the filter. This makes it easier for someone to alter the settings without having to go through the Control Panel all over again.
