Dialing into the UR Network With OS X

**Configuring the Dialup Settings**

Once your computer is connected to the network jack, start your computer, go to the **Apple Menu**, drag down to **System Preferences**. Once there click on **Network**.

Select **Internal Modem** from the **Show**: Dropdown list, and make sure your settings match the following as in the picture below:

- **Service Provider**: UR
- **Telephone number**: 2822077
- **Account Name**: Enter your University USERID or NetID here.

Click **Apply Now**
You may now dial in to the UR network by using the **Internet Connect** application.
